

Hankyu Hanshin Express (HK) Ltd.

Integrated Management System Policy

Link to Life. Link to the World. Link to the Future.

Connecting lives, connecting the world and connecting the future

We are committed to remaining a company that perpetually contributes to the world by globally concerning information and thoughts rather than merely transporting cargo.

Incorporating with the principles of Hankyu Hanshin Express Way, we always bear in mind our corporate values and responsibilities within society. While competing for sustainable returns, we are also committed to improving our Integrated Management System by:

- complying with applicable statutory, regulatory and other requirements,
- trying our best to protect the environment,
- adopting a continual improvement approach towards product, service and environmental performance,
- understanding and meeting rising aspirations of customers,
- communicating this policy to all staff, our external providers and the public, and
- continually developing, implementing and maintaining the IMS that complies with ISO 9001:2015 and ISO 14001:2015 requirements.
