

Environmental Policy

Hankyu Hanshin Express conducts operations including international air- and marine freight transportation, import/export customs clearing and warehousing. Understanding that environmental conservation is an important business challenge faced in the course of providing these services, Hankyu Hanshin Express conducts its business following the below policies in order to minimize the impact that our business activities have on the environment and contribute to the development of an enriched and peaceful society.

- ❖ **Reduction of waste and efficient use of energy resources**
Hankyu Hanshin Express strives to encourage waste reduction and efficient use of energy resources in order to minimize deterioration of the environment.
- ❖ **Development of a resource circulating society**
Hankyu Hanshin Express encourages controlled use, reuse and recycling of materials and goods, and contributes to the development of a resource circulating society.
- ❖ **Continual improvements of environmental management systems**
Hankyu Hanshin Express makes considerations for environmental conservation, encourages continual improvement and endeavors to prevent pollution.
- ❖ **Compliance with laws and regulations**
Hankyu Hanshin Express complies with environment related laws and regulations and other requirements that are complicit with our values.
- ❖ **Development and evaluation of objectives and goals**
Hankyu Hanshin Express develops objectives and goals in line with environmental policies, regularly evaluates performance and completes reviews.
- ❖ **Thorough policy disclosure**
Hankyu Hanshin Express ensures that all employees and business partners are well informed of these policies and discloses the policies to external parties.
